Model RGF
(Order Code AL428)

The Model RGM, RGH, and RGF In-Line load cells are high quality, hermetic, rugged load cells capable of withstanding significant off-axis loads, making them an ideal choice for in-line compression measurement or tension measurement where side loading cannot be completely controlled. The flexible mounting options make applications easier to implement, and the all stainless steel, hermetic construction is well suited to corrosive and very high humidity environments.
