

Jack Weigh Kit™

Technology to the limits. . . and beyond.

Intercomp's Jack Weigh Kit is the aviation industry's most modern and technologically advanced top of jack aircraft weighing system. Its accuracy, reliability, versatility and cost effectiveness are unparalleled in today's market.

The Jack Weigh Kit is the result of our fifteen plus years of manufacturing experience in the high capacity/high accuracy weighing and measurement industry.

This field-proven technology is utilized by the world's commercial airlines, manufacturers, maintenance centers, military branches and f.b.o.'s.

Whether you need to weigh a Boeing 747 in Singapore, an Airbus 310 in Hamburg or a KC135 in Dallas, Intercomp has the weighing system to meet your most exacting weight and balance requirements.
